

Clinton Meyer for Grace Home Furnishings

Sackley Chase Sensation Featuring Fleetwood Windows & Doors

Preserving the minimalist character of Sackley Chase Sensation while enhancing energy efficiency was essential in the renovation of the renowned example of 1970s modern architecture. When it came to retrofitting the home's windows and doors, designers Roger Stoker and Michael Ostrow found their solution in Fleetwood.

With expansive and uninterrupted views, strong aluminum frames with ultra-narrow sidelines, custom rollers, drainage systems, and hardware built for a lifetime of performance and durability, Fleetwood windows and doors faithfully maintain the home's modern aesthetic while upgrading energy efficiency.
